## **DETAILED ACTION**

## **EXAMINER'S AMENDMENT**

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Randol W. Read (Reg. # 43,876) on October 25, 2006.

The application has been amended as follows:

Please amend the claims as follow:

- 5. (Currently Amended) The memory architecture of claim 14 wherein, for each page of memory, a corresponding value of the compression control register is stored in a page table.
- 17. (Currently Amended) A system, comprising:
  - a processor for processing data;
- a cache for storing, in an uncompressed format, data accessed by the processor;
- a compressed memory for storing data accessed by the processor in a compressed format; and

Application/Control Number: 10/675,428 Page 3

Art Unit: 2186

an executable component configured to monitor the available capacity of the compressed memory and, if the available capacity is below a threshold level, recompress data in the compressed memory previously compressed using a first block size, using a second larger block size

wherein said compressed memory is divided into a plurality of pages and includes a page table comprising a plurality of pointers that link to said pages and corresponding block sizes used to compress said pages.

18. (Canceled)

- 19. (Currently Amended) The system of claim <u>17</u>48 wherein the page table further comprises block size data and a compression ratio corresponding to each page.
- 21. (Currently Amended) A method of compressing memory, comprising: compressing data using a selected data block size to generate compressed blocks of data;

storing the compressed blocks of data in a memory having a physical storage size;

calculating a dynamic compression ratio calculated based on the selected data block size and the size of the compressed blocks; and

Application/Control Number: 10/675,428

Art Unit: 2186

increasing the data block size, in response to determining the dynamic compression ratio has fallen below a threshold level

wherein said memory is divided into a plurality of pages and includes a page table comprising a plurality of pointers that link to said pages and corresponding block sizes used to compress said pages.

## Conclusion

2. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Pierre-Michel Bataille whose telephone number is (571) 272-4178. The examiner can normally be reached on Mon-Fri (8:00A to 4:30P).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Matthew M. Kim can be reached on (571) 272-4182. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
